Ideation Phase
Define the Problem Statements

Date	4 march 2026
Team ID	Anushka Madihali, Anuja Chavan, Pranav Sutar,Shrivardhan Patil
Project Name	Heart disease analysis
Maximum Marks	2 Marks

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A cardiologist (Dr. Sharma)	identify high-risk heart disease patients based on lifestyle factors like BMI, smoking, and cholesterol	the data is scattered and difficult to interpret visually	there is no centralized Tableau dashboard to compare patient risk profiles	overwhelmed and unable to design targeted prevention campaigns
PS-2	A government health analyst (Ramesh)	analyze heart disease prevalence across different demographics and regions	the data is not visual or interactive	visual or interactiveit is spread across various static reports and raw CSV datasets	limited in drawing actionable insights for policy development
PS-3	A middle-aged professional (Anita, 45)	monitor my personal heart disease risk factors like cholesterol, blood pressure, and BMI	I cannot compare my metrics with healthy benchmarks easily	there is no simplified personalized dashboard available from my healthcare provider	anxious and uninformed about the steps I need to take to reduce my risk
